SBA * Consulting LTD announces new best practice service for Accounting/ERP/CRM System purchase

Are you looking to purchase and install a new Accounting/ERP/CRM system in your business. Over 60% of all new system installs don't live up to the client's expectations. Using a best practice approach can and will improve the return on investment.

FOR IMMEDIATE RELEASE

PRLog (Press Release) - May 03, 2012 -

Looking to purchase a new Accounting System, or an Enterprise Resource Planning (ERP) or even a Customer Relationship Management (CRM) system?

If you don't use a best practice approach odds are that you'll purchase the wrong software, pick the wrong architecture, have an inefficient implementation while increasing your total cost of ownership and all the while not achieving your goals.

SBA * Consulting can assist in the facilitation of a top-level macro needs assessment so you can create the purchase matrix that covers the needs of the company. We start with asking the question "What does your company do?".

Believe it or not, many many companies don't really know the answer to the question, and without knowing the answer your search for a new accounting system is bound to fail as you get a system that doesn't meet your needs.

Next we can assist you in grading both the horizontal and vertically marketed software in your industry to see which packages meet your needs. In addition we can help you select the correct vendor/implementation team.

Lastly we can assist you with the detailed review of your business as it relates to accounting and operational systems. We review your accounting and your Chart of Accounts. We look for bottlenecks and stovepipes. We examine your internal controls and help develop those Key Performance Indexes (KPI's) and

metrics you need to grow your business.

We interface with your vendor so that before one piece of data is entered into the new accounting system everyone is in agreement and on the same page.

What is unique is that SBA * Consulting doesn't particularly know and need not know any individual accounting software. We are highly experienced Chief Financial Officers with over 25+ years of experience each, in over 50 practice areas. As such, our sole point of focus is from the CFO's chair.

For more information see: <http://www.sbaconsulting.com/literature/AccountingSystemI...>

SBA * Consulting has 14 offices from Boston to Boca Raton with over 60 qualified CFO's. We provide both part-time and interim CFO's as well as project based assistance in such areas as due diligence, litigation support, mock audits, financial turnarounds, real estate relocation project management among others.
